10008 North Marlene Dr.
Affton, MO 63123 USA

Profile

Over twenty five years experience designing and implementing business solutions using information technology in a variety of corporate, non-profit and academic environments. Expert in custom enterprise software application development for web and desktop platforms employing a wide range of both commercial and open source tools. Extensive work in enterprise systems integration and migration. Significant experience in messaging and collaboration systems design and deployment, intranet and groupware application development. Excellent communication, project management and business skills. Considerable experience in the practice and management of information technology consulting and software development.

Experience

Collaboratech, Inc.
Dec 1998 - Present

St. Louis, Missouri
Principal Consultant / Owner

Focused on helping clients to achieve their strategic and tactical business goals and improve their competitive position through the managed implementation of custom software solutions, interactive web-based solutions for the intranet/internet, and collaboration systems.

Major Accomplishments:

- Started and grew a successful information technology consulting firm with no capital to \$1.8M annual revenue.
- Built and managed a team of professional developers and consultants and managed development and infrastructure projects.
- Created, developed and integrated custom software applications to solve problems, improve performance and empower organizations to reach their business objectives.
- Using emerging web technologies, created robust internet and intranet solutions to facilitate communication and collaboration in and between organizations, enable e-commerce, automate and improve business processes, and leverage organizational knowledge.
- Provided information technology planning, design and implementation services
- Participated in and/or managed systems integration and migration projects.
- Architected, designed and supported electronic mail, groupware and other collaborative systems.

Sleeping Dog Software, LLC

Jan 2007 - Dec 2013

St. Louis, Missouri

Chief Technology Officer / Co-Founder

Co-founded and grew a hosted software company; designed and developed hosted software applications (SaaS) for non-profit advocacy and social service agencies. Managed all aspects of the software development lifecycle.

Major Accomplishments:

- Deployed open-source solution case management systems in a hosted environment.
- Architected a robust object model using PHP 5; designed and developed MySQL databases.
- Implemented custom JasperReports using Tomcat and PHP/Java bridge.

lasis Software, Inc.

Jan 2003 - December 2009

St. Louis, Missouri

Principal Software Architect / Co-Founder

Co-founded a biomedical software company; designed, developed and deployed software to automate processes used in umbilical cord blood banks and tissue banks, transplant centers and stem cell laboratories, including collection, processing, inventory control, freezer management, searching and matching, testing, document management, export and outcome reporting.

Major Accomplishments:

- Built and managed operations for a successful biomedical software company with international and domestic customers.
- Designed and developed user interfaces, object models and databases.
